

The true story behind print

INTERGRAF

European paper is typically **sourced from sustainably managed forests** and **recycled materials**

European forests are growing by an area of around

1,500

FOOTBALL
PITCHES
EVERY DAY

European harvesting rates remain **below annual growth**

FIND OUT
MORE

The paper industry in Europe relies largely on **forest residues**, **by-products**, and sustainably harvested wood

EU law **supports sustainable forest management**, and national laws require replanting or natural regeneration after harvesting

SEE THE
PROCESS

Paper does not drive deforestation

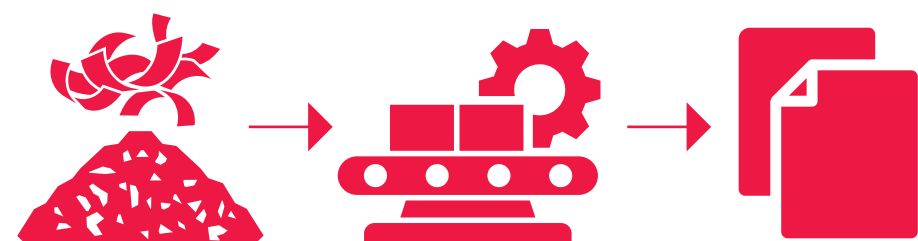

Paper mostly uses wood residues and recycled materials

Timber goes to sawmills

Wooden construction, furniture, and solid products

Residues like sawdust and wood chips go to pulp production

Paper, board & textile fibre manufacturing

WHY IT MATTERS

**The European
printing industry
is a partner in
sustainable forest
management**
